STEEL ON DINGLEY BASIS

Duties on Wool Are About
Equal to Those in Payne-
Aldrich Law.

WASHINGTON, April 11 (Associated Press).—Herewith are given the more important rates in the tariff bill reported to-day to the Senate by the Finance Committee, with comparisons with the Fordney bill and the Payne-Aldrich—the last Republican protective tariff act—and Underwood laws wherever feasible. The ad valorem rates in the Fordney measure are based on American valuation, but they are used here in the comparisons. Experts attached to the committee say that 25 per cent. American valuation is generally equivalent to 50 per cent. foreign valuation.

Because entirely different classifications have been used in drafting the wool schedule in the new bill no comparison of the rates in that schedule with those in the famous schedule K of the Payne-Aldrich bill is undertaken. The raw wool rates in the Senate measure are about equal to those in the Payne-Aldrich law, however, and Senator Smoot of Utah, who drafted the new schedule, says some of the other rates are as high as corresponding provisions in schedule K, while others are lower.
